

hello energy...
...

Get ready for **BREEAM**

Would you like to make your building more sustainable? How nice would it be to score higher during your BREEAM assessment? hello energy is here to help you achieve those goals.

What is BREEAM?

BREEAM (Building Research Establishment Environmental Assessment Method) is the world's most established sustainability certification. It can be used for buildings that are going to be built, buildings in use or refurbished properties. BREEAM rates an asset's environmental, social and economic sustainability performance, using standards developed by BRE. It reflects the value of buildings that have higher performance, and even during the entire lifecycle. This way, this green certificate can create a true impact on the real estate industry. BREEAM is widely used across 50 countries.

What is hello energy?

hello energy helps companies put their sustainable investments in the limelight. We tell a story about the energy and sustainability data of the building. We use visualisations that anyone can understand, and that allows your stakeholders to behave more sustainably. This way, your investments aren't only sustainable, they are truly impactful. How hello energy helps real estate companies become winners:

→ **Get ahead and stay ahead of the game**

Earn credits for multiple certifications such as BREEAM, GRESB and WELL

→ **Improve your investor value**

Green investments just make sense. Don't be late to the party.

→ **Boost your building's performance**

Run your real estate smoothly and align people with your processes.

→ **Engage your audience with actionable insights**

It's what is needed to get everyone on board.

→ **Unlock the power of data**

Better ESG reporting and 100% data coverage worldwide, and smart data drives better decisions.

How hello energy can help you earn credits for BREEAM:

Using hello energy, your building scores higher in a BREEAM assessment. Because we tell the sustainable story of your building and provide insight into your energy usage (credit MAN9) and because we show dynamic travel information (credit TRA7). Since hello energy is also an energy monitoring system, scores on credit WAT2 and credit ENE2 are also possible.

For BREEAM in-use we can add points based on your energy performance (credit ENE68) and health and well-being (credit HEA26).
