Get ready for **WELL**

Would you like to make your building more sustainable? How nice would it be to score higher during your WELL assessment? hello energy is here to help you achieve those goals.

What is WELL?

The WELL Building Standard is the world's leading certification program on well-being. It revolutionizes the way people think about buildings. WELL explores how design, operations and behaviors within the spaces where we live, work, learn, and play can be optimized to advance human health and well-being. Covering ten core concepts of health and hundreds of features, WELL is a flexible building standard and represents the future of modern design.

What is hello energy?

hello energy helps companies put their sustainable investments in the limelight. We tell a story about the energy and sustainability data of the building. We use visualisations that anyone can understand, and that allows your stakeholders to behave more sustainably. This way, your investments aren't only sustainable, they are truly impactful. How hello energy helps real estate companies become winners:

→ **Get ahead and stay ahead of the game**

Earn credits for multiple certifications such as BREEAM, GRESB and WELL

→ **Improve your investor value**

Green investments just make sense. Don't be late to the party.

→ **Boost your building's performance**

Run your real estate smoothly and align people with your processes.

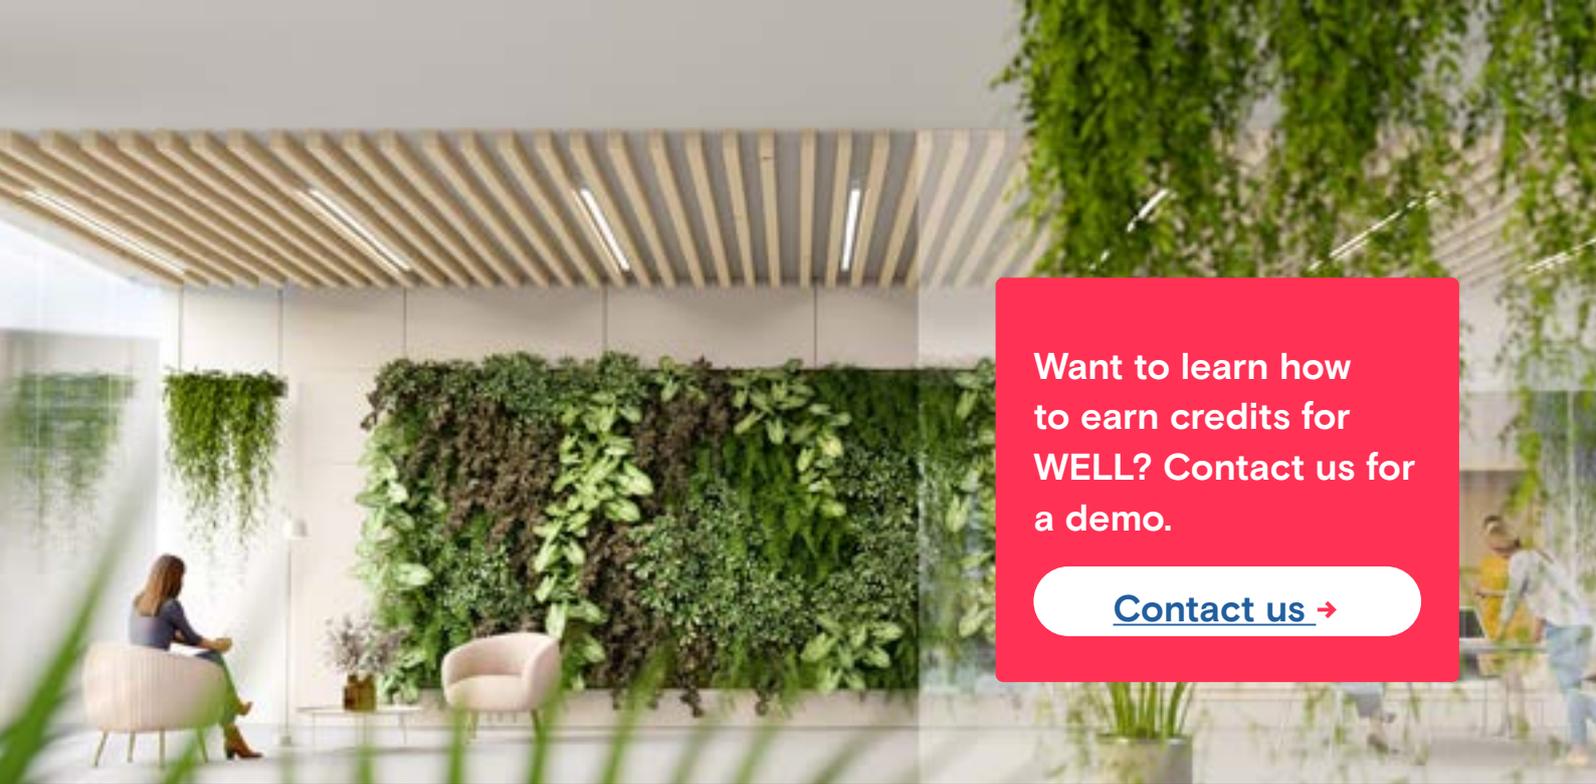

→ **Engage your audience with actionable insights**

It's what is needed to get everyone on board.

→ **Unlock the power of data**

Better ESG reporting and 100% data coverage worldwide, and smart data drives better decisions.

Want to learn how to earn credits for WELL? Contact us for a demo.

How hello energy can help you earn credits for WELL:

WELL has ten concepts: Air, Water, Nourishment, Light, Movement, Thermal Comfort, Sound, Materials, Mind, and Community. Each concept is comprised of features with distinct health intents. Features are either preconditions or optimisations. Using hello energy, you can measure, rate, and visualize your building's performance. And contribute to a high WELL score. For this we have API-connections, sensors, feeds and animations available. Especially on these WELL characteristics:

- Monitoring Fundamental Air Parameters (AO1, part 5)
- Enhanced Air Quality (AO6, part 2)
- Air Quality Monitoring and Awareness (AO8)
- Water Quality Consistency (WO5, part 1)
- Thermal Comfort Monitoring (TO6)
- Fruits and Vegetables (NO1, part 2)
- Food Advertising (NO4, part 1)
- Light Exposure and Education (LO1, part 2)
- Mental Health Promotion (MO1)
- Tobacco Prevention and Cessation (M13, part 1)

You're in great company here's what our customers say:

“Hundreds of people see the impact of our sustainability efforts every day!”

Bouwinvest

“hello energy screens offers a great way to properly inform residents about energy, sustainability and general building updates.”

Syntrus Achmea - real estate and finance

“The hello energy screens show just how important sustainability is to us.”

City of Rotterdam
